

NEW RIVER ELECTRICAL CORP
6005 Westerville Rd
Westerville, Oh 43081
614-891-9132
614-794-0329 fax

Please be advised that American Electric Power has contracted with New River Electrical Corporation to replace the high voltage underground electric utility lines in your neighborhood. To perform this work, we will be digging, boring and using heavy equipment.

New River will be subcontracting CST Utilities to directional bore the new cable or conduit approximately 3' below ground. New River Crews will follow closely to install the new wire in the conduit, terminate and energize the new cable. Yard restoration will be completed by Moore Bros. Landscape as we finish doing the project.

We will be contacting Ohio Utility Protection Service to mark the public utilities with paint and flags (electric, phone, gas, cable TV, water, sewer, etc.). **You, as the homeowner do not need to call Ohio Utility Protection Service.** We are asking that you, the property owner, work with us to locate **private utilities** that are on your property (sewer, water, gas, irrigation, dog fences, etc.) to not cause any damage to these facilities. If damage does occur to any facilities, we will make necessary repairs be it marked or unmarked.

We are asking that you work with the crews as they do this work and feel free to contact them or myself with any questions or concerns.

We will schedule any needed outages. In dealing with facilities underground, unscheduled outages may occur, but we will make every effort to guard against such occurrences.

Sincerely,

Thomas Altier
